(54) Title: **TRICK PLAY USING CRT SCAN MODES**

(57) Abstract: Video frames of a performance are provided at times
at a slower input rate and at other times at a faster input rate. A video
display is automatically switched to a first display scan mode when
receiving frames at the slower input rate, and switched to a second
display scan mode when receiving frames at the faster input rate. The
second display scan mode being different than the first display scan
mode. For example, the display scan modes may have different frame
rates or the first display mode may be progressive and the second dis-
play scan mode may be interlaced.
